Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name:

Date of printing:

DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1 06.10.2023

#### SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier				
Product name:	DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1			
Unique Formula Identifier (UFI-Code):	KM30-E0T8-H00X-MGNM			
Product type:	Curing agent			
1.2 Relevant identified uses of the su	ibstance or mixture and uses advised against			
Field of application:	metal industry			
Identified uses:	Industrial applications, Professional applications, Used by spraying.			
1.3 Details of the supplier of the safe	ty data sheet:			
Producer/Supplier	Bisdorf GmbH Industriestraße 49-51 D-52224 Stolberg			
Telephone	+49 (0) 2402 / 71048			
Telefax E-Mail adress	+49 (0) 2402 / 75465 bisdorf-lacke@arcor.de			
<b>1.4 Emergency telephone number</b> Emergency information	Information Center against Poisons University Bonn			
Telephone number	+49 (0)228 / 19240			
Date of issue:	06.10.2023			
Date of previous issue:	09.01.2023			

#### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition: Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP]

#### Classification acc. to GHS

Section	Hazard class	Hazard class and category	Hazard statement
2.6	flammable liquid	Flam. Liq. 3	H226
3.11	acute toxicity (inhal.)	Acute Tox. 4	H332
3.2	skin corrosion/irritation	Skin Irrit. 2	H315
3.4S	skin sensitisation	Skin Sens. 1	H317
3.8R	specific target organ toxicity - single exposure (respiratory tract irritation)	STOT SE 3	H335
3.8D	specific target organ toxicity - single exposure (narcotic effects, drowsiness)	STOT SE 3	H336

See Section 11 for more detailed information on health effects and symptoms.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name:

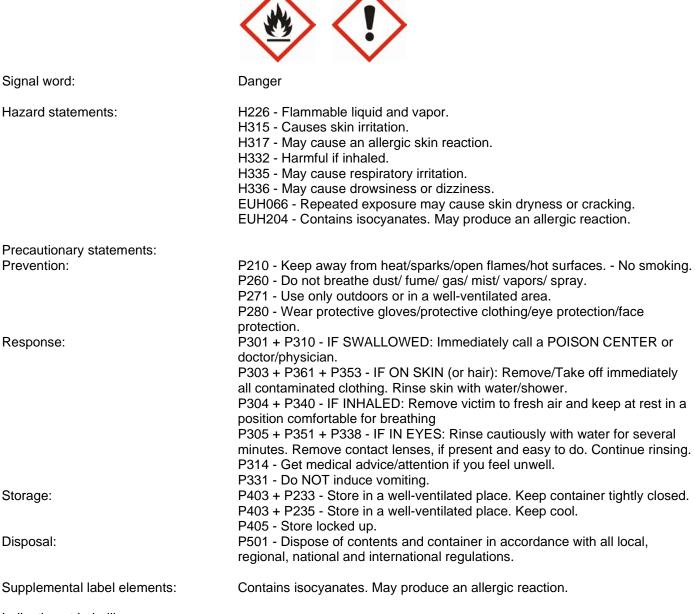

Date of printing:

DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1 06.10.2023 Gmbł

ackfabrikation

#### 2.2 Label elements

Hazard pictograms:

Indication at Labelling:

The pictogram GHS 02 (flame) can according GHS/CLP Art. 33 (3) substituted to label of ADR.

#### 2.3 Other hazards

Endocrine disrupting properties (human health):

The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Endocrine disrupting properties (environment):

The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name:

Date of printing:

#### DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1 06.10.2023

PBT and vPvB assessment:

This substance/mixture contains components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB).

#### **SECTION 3: Composition/information on ingredients**

#### 3.2 Mixtures

Product/ingredient name	Identifiers	%	Classification 1272/2008/EC (CLP)	Туре

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance does not meet the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII.

[5] Substance of equivalent conce.

[6] No restriction regulation for the industrial and professional use of this product as the concentration is less than 0.1%.

Occupational exposure limits, if available, are listed in Section 8.

#### **SECTION 4: First aid measures**

#### 4.1. Description of first aid measures

General information:

In all cases of doubt, or when symptoms persist, seek medical attention. If unconscious, place in recovery position and get medical attention immediately. Never give anything by mouth to an unconscious person. In any case show the physician the Safety Data Sheet.

Product name:

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Date of printing:	one coat paint, mixing rate 10:1 06.10.2023
Inhalation:	Remove affected persons from dangerous area by observing suitable respiratory Protection measures. Remove the casualty into fresh air and keep at rest. After intensive inhalation consult a doctor in every case, even if no symptoms occur.
Skin contact:	Take off immediately all contaminated clothing. Wash contaminated clothing before reusing. Do not allow the product to dry on the skin. Wash skin thoroughly with soap and water or use recognised skin cleanser. Consult a doctor in case of persisting skin irritation.
Eye contact:	Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Begin with medical treatment.
Ingestion:	If swallowed, rinse mouth with water (only if the person is conscious). Do not induce vomiting unless directed to do so by medical personnel. Seek medical attention.
4.2 Most important symp	otoms and effects, both acute and delayed
General information:	When inhaled or swallowed depending on the time and amount, it can give rise to the

DD-Härter B05-901/10 for two component

#### 4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician:

Symptomatic treatment.

#### **SECTION 5: Firefighting measures**

#### 5.1 Extinguishing media

Suitable:

Extinguishing measures to suit surroundings. In case of fire, use water spray jet, dry extinguishing powder, foam or carbon dioxide. water jet.

following symptoms: headaches, giddiness, tiredness, nausea, vomiting, irregular

heart beat, intoxication, unconsciousness, asphyxiation and fatality.

Not suitable:

#### 5.2 Special hazards arising from the substance or mixture

Hazardous combustion Products:	Fire will produce dense black smoke containing hazardous combustion products. In a fire, the following may be released: carbon dioxide, carbon monoxide, not combusted hydrocarbons.
5.3 Advice for firefighters	

# Special protective<br/>equipment for fire-fighters:During fire-fighting wear self-contained breathing apparatus and protective clothing.Additional information:The product is flammable. Use water spray to keep fire-exposed containers cool.<br/>Use extinguishing media suitable for surrounding materials. Fire residues and<br/>contaminated fire extinguishing water must be disposed of in accordance with local<br/>regulations.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name:

Date of printing:

DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1 06.10.2023

#### SECTION 6: Accidental release measures

#### 6.1 Personal precautions, protective equipment and emergency procedures

General information: To avoid fire, eliminate ignition sources. Provide adequate ventilation. Use personal protective equipment. Avoid contact with eyes, skin and clothing. Avoid breathing vapours, spray or mists.

#### 6.2 Environmental precautions

General information: Do not discharge into the drains / surface waters / groundwater. Prevent spread over a wide area e.g. by containment or oil barriers.

#### 6.3 Methods and material for containment and cleaning up

General information: Absorb with liquid-binding material (sand, diatomite, universal binders etc.) or use a spill kit. Containers in which spilt substance has been collected must be adequately labelled. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

#### 6.4 Reference to other sections

General information:See Section 1 for emergency contact information.See Section 8 for information on appropriate personal protective equipment.See Section 13 for additional waste treatment information.

#### **SECTION 7: Handling and storage**

#### 7.1 Precautions for safe handling

Protective measures: Keep away from sources of ignition - No smoking. Vapours may form explosive mixtures with air. Take precautionary measures against electrostatic discharges. Provide good ventilation of working area. The working procedure should be planned as far as allowed by state-of-the-art technology so as to avoid release of hazardous substances or prevent skin contact. The level of risk involved in product handling must be reduced to a minimum by means of protective and preventive measures.

#### 7.2 Conditions for safe storage, including any incompatibilities

General information: Store in a dry, cool and well-ventilated area. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. Store in accordance with local regulations.

German storage class: 10 - Combustible liquids neither in Storage Class 3

#### 7.3 Specific end use(s)

See separate Product Data Sheet for recommendations or industrial sector specific solutions.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name:

DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1 06.10.2023

Date of printing:

#### **SECTION 8: Exposure controls/personal protection**

#### 8.1 Control parameters

#### Occupational exposure limit values (Workplace Exposure Limits)

			-		-			
Product/ingrediet name	CAS-Nr.	Nota -tion	ldenti- fier	TWA [ppm]	TWA [mg/m³]	STEL [ppm]	STEL [mg/m³]	Source

#### 8.2 Exposure controls / personal protection

Engineering measures

Refer to protective measures listed in sections 7.

#### Personal protective equipment:

Respiratory protection	Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If working areas have insufficient ventilation: When the product is applied by means that will not generate an aerosol such as, brush or roller wear half or totally covering mask equipped with gas filter of type A, when grinding use particle filter of type P. Be sure to use an approved/certified respirator or equivalent.			
Hand protection	If there is a potential for product skin contact, use of gloves tested to e.g. EN 374 will provide sufficient protection. Protective gloves should in any case be tested for workplace-specific suitability (e.g. mechanical resistance, product compatibility, antistatic properties). Comply with instructions and information provided by the glove manufacturer concerning use, care and replacement of the gloves. Replace protective gloves immediately upon damage or at the first signs of wear. As far as possible, plan work procedures so that wearing gloves will not be necessary.			
		Long term exposure	Short term exposure	
	Recommended gloves should be made of	Viton®	Nitril.	
	Material thickness	>0,7 mm	>0,4 mm	
	Permeation time >480 min >4			
Eye protection	Safety goggles with lateral sh	ielding (DIN EN 166)		

**Body protection** Usual working clothes for the chemical industry, suitable for the job.

#### Environmental exposure controls:

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name:

DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1 06.10.2023

Date of printing:

#### **SECTION 9: Physical and chemical properties**

#### 9.1 Information on basic physical and chemical properties

Appearance	
Physical state: Fluid	Colour: Colorless

Odor: Characteristic

Odor threshold: Not relevant for the hazard classification of the product.

#### Security-relevant basic data

Parameter	
pH-value	Not applicable.
Melting point/Melting range	-76 °C
Boiling point/Boiling range	124 - 128 °C
Flash point	~25 °C (IP 170 (ABEL))
Flammability (solid / gas)	Not applicable.
Ignition temperature	~420 ° C (lowest value of the individual components)
Decomposition temperature	Not determined.
Auto-ignition temperature	The product is not self-igniting.
Explosive properties	Product is not explosive. However, formation of explosive air/steam mixtures as possible.
Explosion limits Lower Upper Oxidizing properties	1,2 %(Vol) 7,5 %(Vol) Not determined
Vapour pressure	13 hPa (20 °C)
Density	~1,03 g/cm³ (20 °C)
Vapor density	Not determined
Evaporation rate	No data available.
Solubility in Miscibility with water	Organic solvents (see point 3) Reacts with water! (immiscible at 15 °C)
Partition coefficient: (n-octanol/water)	Testing not relevant or not possible due to nature of the product.
Viscosity (expiry time after DIN 53211) Dynamic: Kinematic:	~10 s DIN 4mm (20°C)
Solvent separation test	< 3% (20°C)

#### 9.2. Other information

No additional information.

#### SECTION 10: Stability and reactivity

**10.1 Reactivity** General information:

No specific test data related to reactivity available for this product or its ingredients.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name:	DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1
Date of printing:	06.10.2023
<b>10.2 Chemical stability</b> General information:	The product is stable.
<b>10.3 Possibility of hazardous</b> General information:	s reactions Rubber and other synthetic material can be affected.
<b>10.4 Conditions to avoid</b> General information:	The product is flammable. Keep away from excessive heat, sparks or open fire.
<b>10.5 Incompatible materials</b> General information:	oxidising agents, acids
10.6 Hazardous decompositi	•
General information:	Thermal disintegration depends to a great extent on the external conditions. A complex mixture of solids, liquids and gases forms in the air, including among other substances carbon dioxide, carbon monoxide and other organic compounds, when

### this material is burnt or is thermally or oxidatively degraded. SECTION 11: Toxicological information

#### **11.1 Information on toxicological effects**

Product/ingredient name	Result	Species	Dose	Exposure

ethylbenzene	Category 2	Not determined	Hearing organs

#### **Aspiration hazard**

Product/ingredient name	Result
xylene (mixture of isomers)	ASPIRATION HAZARD - Category 1
ethylbenzene	ASPIRATION HAZARD - Category 1

#### Information on the likely routes of exposure

Routes of entry anticipated: Oral, Dermal, Inhalation.

#### Potential chronic health effects

Inhaling of solvent components above the MWC-value can lead to health damage, e.g. irritation of the mucous membrane and respiratory organs, as well as damage to the liver, kidneys and the central nerve system. Indications for this are: headache, dizziness, fatigue, amyosthenia, drowsiness, in serious cases: unconsciousness. Solvents may cause some of the aforementioned effects through skin resorption. Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in non-allergic contact dermatitis and/or absorption through skin. Splashing may cause eye irritation and reversible damag.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name:

DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1 06.10.2023

Date of printing:

#### 11.2 Endocrine disrupting properties

The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

#### 11.3 Other hazards

The product is flammable. Keep away from excessive heat, sparks or open fire. In use, may form flammable/explosive vapourair mixture. Electrostatic charges may be generated during pumping, release of which may cause a fire.

#### **SECTION 12: Ecological information**

#### 12.1 Toxicity

Product/ingredient name	Result	Species	Exposure
xylene (mixture of isomers)	Acute EC50 3,82 mg/l	Daphnie - Daphnia magna	48 hours
	Acute EC50 4,7 mg/l	Algae- Pseudokirchneriella subcapitata	72 hours

#### 12.2 Persistence and degradability

Product/ingredient name	Result
xylene (mixture of isomers)	87,8 % - 28 days
n-butyl acetate	90 % - 28 days
hexamethylene-1,6-diisocyanate (oligomere)	0 % - Not readily - 28 days
hexamethylene-di-isocyanate	42 % - Not readily - 28 days

Product/ingredient name	Aquatic half-life	Photolysis	Biodegradability
xylene (mixture of isomers)	-	-	Readily
n-butyl acetate	-	-	Readily
hexamethylene-1,6-	-	-	Not readily
diisocyanate (oligomere)			
hexamethylene-di-isocyanate	-	-	Not readily

#### 12.3 Bioaccumulative potential

Product/ingredient name	LogPow	BCF	Potential
xylene (mixture of isomers)	3.16	25.9	low
n-butyl acetate	2.3	-	low
hexamethylene-1,6-diisocyanate (oligomere)	3.15	3.2	low
hexamethylene-di-isocyanate	0.02	57.63	low

#### 12.4 Mobility in soil

Soil/water partition coefficient (KOC):

Not available.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name:

DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1 06.10.2023

Date of printing:

#### 12.5 Results of PBT and vPvB assessment

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

#### 12.6 Endocrine disrupting properties

The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

#### SECTION 13: Disposal considerations

#### 13.1 Waste treatment methods

The generation of waste should be avoided or minimised wherever possible. Residues of the product is listed as hazardous waste. Dispose of according to all state and local applicable regulations. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Spillage, remains, discarded clothes and similar should be discarded in a fireproof container.

European waste catalogue no. (EWC) is given below.

European waste catalogue (EWC): 08 01 11\*

#### Packaging

The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

#### **SECTION 14: Transport information**

Transport may take place according to national regulation or ADR for transport by road, RID for transport by train, IMDG for transport by sea, IATA for transport by air.

	14.1 UN no.	14.2 Proper shipping name	14.3 Trans	port hazard class(es)	14.4 PG*	14.5 Env*	Additional information
ADR/RID Class	UN1263	PAINT RELATED MATERIAL	3		111	No.	Tunnel code (D/E)
IMDG Class	UN1263	PAINT RELATED MATERIAL	3	<b></b>	III	No.	Emergency schedules F-E, S-E
IATA Class	UN1263	PAINT RELATED MATERIAL	3	•	111	No.	-
PG*.: Pad	cking group	Env.* : Environme	ental haz	ards			

PG\*.: Packing group

#### 14.6 Special precautions for user

Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

#### 14.7 Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code

Not applicable.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name:

DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1 06.10.2023

Date of printing:

#### **SECTION 15: Regulatory information**

#### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

#### EU Regulation

Regulation (EG) Nr. 1907/2006 (REACH)

Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), with supplements.

Regulation (EG) Nr. 1272/2008 (CLP) Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labeling and packaging of substances and mixtures (CLP), with supplements.

EU Regulation (EC) No. 1907/2006 (REACH) Annex XIV - List of substances subject to authorisation Substances of very high concern

Substances mentioned on the so-called "candidate list of substances of very high concern (SVHC) for authorisation" published by the EChA are not intentionally added to this product. Therefore it is not expected, that these substances are present in amounts of  $\geq 0,1\%$  in this product.

#### National legislation (Germany)

Water hazard class:	WGK 2 (Assessment by list): hazardous for water.
VOC:	480 g/I DIN ISO 11890 (Council Directive 1999/13/EC).
Information about limitation of use:	Employment restrictions concerning young persons must be observed.

#### **15.2 Chemical Safety Assessment**

This product contains substances for which Chemical Safety Assessments are still required.

#### **SECTION 16: Other information**

#### Abbreviations and acronyms:

Abbr.	Descriptions of used abbreviations
ADR	Accord européen relatif au transport international des marchandises dangereuses par route

#### Notice to reader

The information contained in this safety data sheet is based on the present state of knowledge and EU and national legislation. It provides guidance on health, safety and environmental aspects for handling the product in a safe way and should not be construed as any guarantee of the technical preformance or suitability for particular applications. It is always the duty of the user/employer to ascertain that the work is planned and carried out in accordance with the national regulations.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

#### Annex: Exposure scenario 1

#### **SECTION 1: Title section**

Short title of the exposure scenario Formulation & (re)packing of substances and mixtures (Industrial) Sector of Use SU3 Industrial uses: Uses of substances as such or in preparations at industrial sites Process category

PROC1 Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions.

PROC2 Chemical production or refinery in closed continuous process with occasional controlled exposure or processes with equivalent containment conditions

PROC3 Manufacture or formulation in the chemical industry in closed batch processes with occasional controlled exposure or processes with equivalent containment condition

PROC4 Chemical production where opportunity for exposure arises

PROC5 Mixing or blending in batch processes

PROC8a Transfer of substance or mixture (charging and discharging) at non-dedicated facilities PROC8b Transfer of substance or mixture (charging and discharging) at dedicated facilities PROC9 Transfer of substance or mixture into small containers (dedicated filling line, including weighing) PROC14 Tabletting, compression, extrusion, pelletisation, granulation

PROC15 Use as laboratory reagent

Environmental release category ERC2 Formulation into mixture

#### Description of the activities / processes covered in the Exposure Scenario

Formulation, packing and re-packing of the substance and its mixtures in batch or continuous operations, including storage, materials transfers, mixing, tabletting, compression, pelletisation, extrusion, large and small scale packing, sampling, maintenance and associated laboratory activities.

#### **SECTION 2: Conditions of use affecting exposure**

The usual precautionary measures should be adhered to in handling the chemicals. Duration and frequency 8hrs (full working shift). Worker

Frequency of use: 5 workdays/week. Physical parameters Physical state Fluid Vapour pressure: 0.5-10 kPa (20 °C) Concentration of the substance in the mixture Covers use of substance / product up to 100% Used amount per time or activity Regional use tonnage (tonnes/year): 15000, SU3 Annual site tonnage (tonnes/year): 3750, SU3 Maximum daily site tonnage (kg/day): 12500, SU3 Other operational conditions Emission days / year: 300 Assumes use at not more than 20°C above ambient temperature (unless stated differently). Assumes a good basic standard of occupational hygiene is implemented. Other operational conditions affecting environmental exposure Local freshwater dilution factor: 10 Local marine water dilution factor: 100 Release fraction to air from process (initial release prior to RMM) / wide dispersive use (regional only): 1 %. Release fraction to wastewater from process (initial release prior to RMM) / wide dispersive use: 0.2 %. Release fraction to soil from process (initial release prior to RMM) / wide dispersive use (regional only):

0.01 %.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Treat air emission to provide a typical removal efficiency of (%): 0

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name:

Date of printing:

DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1 06.10.2023

Water

Sludge treatment: Incineration or in a landfill

Prevent discharge of undissolved substance to or recover from onsite wastewater.

Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs (%): 93.6

Maximum allowable site tonnage (MSafe) based on release following total wastewater treatment removal (kg/day): 6.31

Assumed domestic sewage treatment plant flow (m3/d): 2000

**Soil** Use bunds or dykes around storage facilities to prevent soil and water pollution in the event of a spill. **Disposal measures** 

External treatment and disposal of waste should comply with applicable local and/or national regulations. External recovery and recycling of waste should comply with applicable local and/or national regulations. **Waste type** Partially emptied and uncleaned packaging **Notes** Disposal must be made according to official regulations.

#### **SECTION 3: Exposure estimation**

Worker (oral) No significant oral exposure. Worker (dermal) PROC 1/3/15: Exposure estimate: 0.34 mg/kg/day RCR: 0 PROC 2: Exposure estimate: 1.37 mg/kg/day RCR: 0.01 PROC 4 / 8b / 9: Exposure estimate: 6.86 mg/kg/day RCR: 0.04 PROC 5 / 8a: Exposure estimate: 13.71 mg/kg/day RCR: 0.04 PROC 14: Exposure estimate: 3.43 mg/kg/day RCR: 0.02 Worker (inhalation) PROC 1: Exposure estimate: 0.01 ppm RCR: 0 PROC 2 / 15: Exposure estimate: 10 ppm RCR: 0.56 PROC 3: Exposure estimate: 17.5 ppm RCR: 0.99 PROC 4: Exposure estimate: 14 ppm RCR: 0.79 PROC 5 / 8a / 8b / 9 / 14: Exposure estimate: 15 ppm RCR: 0.85 Environment The calculated value is smaller than the PNEC. Consumer Not relevant for this Exposure Scenario.

### mponent La

#### SECTION 4: Guidance for downstream users

The exposure estimation was carried out in accordance with ECETOC TRA.

Version 3. http://www.ecetoc.org/tra

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/ Operational Conditions outlined in Section 2 are implemented. Where other Risk Management Measures/ Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name:

DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1 06.10.2023

Product name:

#### Technical protective measures

Provide explosion-proof electrical equipment.

Ensure that suitable extractors are available on processing machines

#### Personal protective measures

Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.

Do not inhale gases / fumes / aerosols.

Safety glasses

Measures for consumer protection Not relevant for this Exposure Scenario.

#### Environmental protection measures

Air

Treatment of air emissions is not required for the purposes of REACH compliance but may be needed to comply with other environmental legislation.

Treat air emission to provide a typical removal efficiency of (%): 90

Water

Sludge treatment: Incineration or in a landfill

Prevent discharge of undissolved substance to or recover from onsite wastewater.

Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs (%): 93.6

Maximum allowable site tonnage (MSafe) based on release following total wastewater treatment removal (kg/day): 69000

Assumed domestic sewage treatment plant flow (m3/d): 2000

**Soil** Use bunds or dykes around storage facilities to prevent soil and water pollution in the event of a spill. **Notes** In case of unintended release of the product: See section 6 of the Safety Data Sheet.

#### Disposal measures

External treatment and disposal of waste should comply with applicable local and/or national regulations. External recovery and recycling of waste should comply with applicable local and/or national regulations. **Waste type** Partially emptied and uncleaned packaging

Notes Disposal must be made according to official regulations.

Release fraction to air from process (initial release prior to RMM) / wide dispersive use (regional only): 98 %.

Release fraction to wastewater from process (initial release prior to RMM) / wide dispersive use: 1 %. Release fraction to soil from process (initial release prior to RMM) / wide dispersive use (regional only): 1 %.

#### Other operational conditions affecting worker exposure

Clean working place and equipment every day. Avoid splashing. Remove spilled product immediately. Keep container tightly closed in a cool place.

Avoid contact with the skin and eyes.

**Other operational conditions affecting consumer exposure during the use of the product** Not applicable.

#### Risk management measures

Ensure that personal protective measures are used at all activities.

Other skin protection measures such as impervious suits and face shields may be required during high dispersion activities which are likely to lead to substantial aerosol release, e.g. spraying.

#### Worker protection

Storage (PROC1 / PROC2):

Store substance within a closed system.

General exposures / Use (closed systems) PROC1 / PROC2 / PROC3:

Filling / preparation of equipment from drums or containers (Use in closed systems) PROC2:

Ensure material transfers are under containment or extract ventilation.

Preparation of material for application. Use in contained batch (PROC3):

Provide a good standard of general or controlled ventilation (5 to 15 air changes per hour).

Use drum pumps or carefully pour from container.

Film formation - air drying Indoor (PROC4):

Provide a good standard of general ventilation.

Provide extract ventilation to points where emissions (can) occur.

Avoid manual contact with wet work pieces.

Film formation - air drying Outdoors (PROC 4):

Ensure operation is undertaken outdoors. Avoid manual contact with wet work pieces. Clear spills immediately.

Avoid carrying out activities involving exposure for more than 1 hour(s).

Preparation of material for application Indoor PROC 5:

Provide a good standard of general ventilation (10 to 15 air changes per hour).

Controlled ventilation means air is supplied or removed by a powered fan.

Avoid carrying out activities involving exposure for more than 1 hour(s).

Preparation of material for application Outdoor (PROC 5):

Ensure operation is undertaken outdoors.

Avoid carrying out activities involving exposure for more than 1 hour(s).

Material transfers Drum/Batch transfer (Non-dedicated facility) PROC8a:

Material transfers Drum/batch transfers (Non-dedicated facility) PROC8b:

Material transfers Drum/batch transfers (dedicated facility) PROC8b:

Transfer via enclosed lines.

Clear transfer lines prior to de-coupling.

Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour).

Equipment cleaning and maintenance (Non-dedicated facility) PROC 8a:

Drain down system prior to equipment break-in or maintenance.

Avoid carrying out activities involving exposure for more than 4 hour(s).

Provide a good standard of general or controlled ventilation (10 to 15 air changes per hour). Roller, spreader, flow application Indoor (PROC 10):

Provide a good standard of general or controlled ventilation (10 to 15 air changes per hour). Wear a respirator conforming to EN140 with Type A filter or better.

Roller, spreader, flow application Outdoor (PROC 10):

Dipping, immersion and pouring Outdoor (PROC 13):

Ensure Operation is undertaken outdoors. Wear a respirator conforming to EN140 with Type A filter or better. Automate activity where possible.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1 06.10.2023

Spraving Manual (PROC 11):

Product name:

Date of printing:

Carry out in a vented booth or extracted enclosure. Spraying (PROC 11, außen):

Ensure operation is undertaken outdoors.

Avoid carrying out activities involving exposure for more than 4 hour(s).

Wear a respirator conforming to EN140 with Type A filter or better.

Dipping, immersion and pouring Indoor (PROC 13):

Use local exhaustion at places where emission can occur.

Avoid carrying out activities involving exposure for more than 4 hour(s).

Laboratory activities (PROC15):

Handle substance within a predominantly closed system provided with extract ventilation.

Hand application - fingerpaints, pastels, adhesives PROC19 Indoor:

Provide a good standard of general or controlled ventilation (10 to 15 air changes per hour).

Limit the substance content in the product to 5%.

Hand application - fingerpaints, pastels, adhesives PROC19 Outdoor:

Ensure operation is undertaken outdoors.

Limit the substance content in the product to 5%.

Avoid carrying out activities involving exposure for more than 4 hour(s).

#### Organisational protective measures

Ensure good ventilation. This can be achieved by using a local exhaustion or general exhaust system. If these measures are insufficient to keep the solvent vapour concentration below the workplace limit, wear an adequate respiratory protective device.

The employer must ensure that the necessary personal protective devices are available and applied accordingly to the instructions.

#### Technical protective measures

Provide explosion-proof electrical equipment.

Ensure that suitable extractors are available on processing machines

#### Personal protective measures

Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.

Do not inhale gases / fumes / aerosols.

Safety glasses

Measures for consumer protection Not relevant for this Exposure Scenario.

#### Environmental protection measures

Air

Treatment of air emissions is not required for the purposes of REACH compliance but may be needed to comply with other environmental legislation.

Treat air emission to provide a typical removal efficiency of (%): 0

#### Water

Sludge treatment: Incineration or in a landfill

Prevent discharge of undissolved substance to or recover from onsite wastewater.

Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs (%): 93.6

Maximum allowable site tonnage (MSafe) based on release following total wastewater treatment removal (kg/day): 4600

Assumed domestic sewage treatment plant flow (m3/d): 2000

**Soil** Use bunds or dykes around storage facilities to prevent soil and water pollution in the event of a spill. **Disposal measures** 

External treatment and disposal of waste should comply with applicable local and/or national regulations. External recovery and recycling of waste should comply with applicable local and/or national regulations. **Waste type** Partially emptied and uncleaned packaging

**Notes** Disposal must be made according to official regulations.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Consumer Not relevant for this Exposure Scenario.

#### SECTION 4: Guidance for downstream users

The exposure estimation was carried out in accordance with ECETOC TRA. Version 3. http://www.ecetoc.org/tra

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/ Operational Conditions outlined in Section 2 are implemented. Where other Risk Management Measures/ Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

#### Other operational conditions affecting worker exposure

Clean working place and equipment every day. Avoid splashing. Remove spilled product immediately. Keep container tightly closed in a cool place.

Avoid contact with the skin and eyes.

**Other operational conditions affecting consumer exposure during the use of the product** Not applicable.

#### Risk management measures

Ensure that personal protective measures are used at all activities.

Wear suitable gloves tested to EN374 during the activities where excessive skin contact is possible. Eye Protection – suitable eye protection should be worn when handling product if there is a risk of splashing.

#### Worker protection

General exposures / Use (closed systems) PROC1 / PROC2 / PROC3:

General exposures / Use (open systems) PROC4:

Mixing operations (open systems) PROC5:

No other specific measures identified.

Spraying PROC7:

Daily cleaning of equipment and work area. It must be ensured that the work is carried out outside the breathing zone of the worker (head-product distance greater than 1m). Regular inspection and maintenance of equipment and machinery.

Carry out in a vented booth or extracted enclosure.

Material transfers Drum/Batch transfer (Non-dedicated facility) PROC8a:

Use local exhaustion at places where emission can occur.

Material transfers Drum/batch transfers (Non-dedicated facility) PROC8b:

Material transfers Drum/batch transfers (dedicated facility) PROC8b:

Transfer via enclosed lines.

Clear transfer lines prior to de-coupling.

Apply by Rolling or Brushing (PROC10):

Treatment by dipping and pouring (PROC13):

Provide a good standard of general or controlled ventilation (10 to 15 air changes per hour).

Use of a local source exhaust with adequate effectiveness.

#### Organisational protective measures

Ensure good ventilation. This can be achieved by using a local exhaustion or general exhaust system. If these measures are insufficient to keep the solvent vapour concentration below the workplace limit, wear an adequate respiratory protective device.

The employer must ensure that the necessary personal protective devices are available and applied accordingly to the instructions.

#### Technical protective measures

Provide explosion-proof electrical equipment.

Ensure that suitable extractors are available on processing machines

#### Personal protective measures

Detailed measures on hand protection according to Safety Data Sheet, section 8.

Do not inhale gases / fumes / aerosols.

Measures for consumer protection Not relevant for this Exposure Scenario.

#### Environmental protection measures

Air

Treatment of air emissions is not required for the purposes of REACH compliance but may be needed to comply with other environmental legislation.

#### Water

Size of sewage treatment plant (m³/d): 2000

Maximum allowable site tonnage (MSafe) based on release following total wastewater treatment removal (kg/day): 1080.7

Prevent discharge of undissolved substance to or recover from onsite wastewater.

Soil No special measures required.

#### Disposal measures

Must not be disposed of with household waste. Do not allow to reach sewage system. Disposal must be made according to official regulations.

Main User Groups	: <b>SU 3:</b> Industrial uses: Uses of substances as such or in preparations at industrial sites				
Sector of use	<ul> <li>SU12: Manufacture of plastics products, including compounding and conversion</li> <li>SU13: Manufacture of other non-metallic mineral products, e.g. plasters, cement</li> <li>SU19: Building and construction work</li> </ul>				
Process category	<ul> <li>PROC1: Use in closed process, no likelihood of exposure PROC2: Use in closed, continuous process with occasional controlled exposure</li> <li>PROC3: Use in closed batch process (synthesis or formulation)</li> <li>PROC4: Use in batch and other process (synthesis) where opportunity for exposure arises</li> <li>PROC5: Mixing or blending in batch processes for formulation of preparations and articles (multistage and/ or significant contact)</li> <li>PROC7: Industrial spraying</li> <li>PROC8a: Transfer of substance or preparation (charging/ discharging) from/ to vessels/ large containers at non-dedicated facilities</li> <li>PROC9: Transfer of substance or preparation into small containers (dedicated filling line, including weighing)</li> <li>PROC10: Roller application or brushing</li> <li>PROC13: Treatment of articles by dipping and pouring</li> <li>PROC14: Production of preparations or articles by tabletting, compression, extrusion, pelletisation</li> <li>PROC15: Use as laboratory reagent</li> </ul>				
Environmental release category	<ul> <li>ERC5: Industrial use resulting in inclusion into or onto a matrix ERC6a: Industrial use resulting in manufacture of another substance (use of intermediates)</li> <li>ERC6c: Industrial use of monomers for manufacture of thermoplastics ERC6d: Industrial use of process regulators for polymerisation processes in production of resins, rubbers, polymers</li> </ul>				
2.1 Contributing scenario controlling e	environmental exposure for: ERC5, ERC6a, ERC6c, ERC6d				

#### Product characteristics Molar Mass : 545 g/mol : < 0,00000319 hPa at 20 °C Vapour pressure Amount used Annual amount used per site: : > 1000

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name:	DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1
Date of printing:	06.10.2023
Environment factors not influe	
Remarks	: None identified for this scenario.
Number of emission days pe	affecting environmental exposure r vear : < 300
Emission or Release Factor:	
Emission or Release Factor:	
Emission or Release Factor:	
ETHISSION OF RELEASE FACIOL	
Technical conditions and meas	sures / Organizational measures
Technical onsite conditions	and measures to reduce or limit discharges, air emissions and releases to soil
Air	<ul> <li>All waste gases from processes are transferred to a combustion unit or to an activated carbon filter.</li> </ul>
Water	: No waste water occurs.
Soil	: Sealing of all relevant soil surfaces in the facility is required.
Organizational measures to	prevent/limit release from the site
Remarks	: Procedural and/or control technologies are used to minimise
	emissions and the resulting exposure during cleaning and
	maintenance procedures.
Conditions and measures related	ed to external treatment of waste for disposal
Waste treatment	: Organic solvent used for cleaning procedures is disposed off via a
	hazardous waste combustion unit. The waste from processes is
	disposed by incineration in a waste combustor. During waste
	treatment, exposure of the environment is not expected.
2.2 Contributing scenario contributing	olling worker exposure for:

### PROC1, PROC2, PROC3, PROC4, PROC5, PROC7, PROC8a, PROC8b, PROC9, PROC10, PROC13, PROC14, PROC15

#### **Product characteristics**

Concentration of the Substance in Mixture/Article

Remarks	: In the range of 50%.
Molar Mass	: 545 g/mol
Vapour pressure Physical Form (at time of use)	: < 0,00000319 hPa at 20 °C : Liquid substance
Frequency and duration of use	
Frequency of use	: <= 220 days/year
General exposures	: 8 hours/day
PROC 5	: 1 - 4 hours/day
PROC 7	: 1 - 4 hours/day
PROC 8a	: 1 - 4 hours/day

#### Human factors not influenced by risk management

Remarks	: None identified for this scenario.

#### Other operational conditions affecting workers exposure Outdoor / Indoor : Indoor use

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name:

Date of printing:

#### DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1 06.10.2023

#### Technical conditions and measures

Use with local exhaust ventilation. Minimal efficiency extract ventilation: 90% In long-term processes where contact to substance cannot be excluded (e.g. filling and mixing operations), containment (e.g. housing) is recommended.

#### **PROC7: Industrial spraying**

Local exhaust ventilation (about 0.3 m/s) has to be used from top to down and overspray has to be collected in a filter.

#### Organisational measures to prevent /limit releases, dispersion and exposure

Procedural and/or control technologies are used to minimise emissions and the resulting exposure during cleaning and maintenance procedures. Persons who suffer from skin complaints or other hypersensitivity reactions of skin should not work with the product. Control staff entry to work area. Ensure all equipment is well maintained. Regular cleaning of equipment, work area and clothing.

#### PROC5: Mixing or blending in batch processes for formulation of preparations and articles (multistage and/ or significant contact)

Elevated exposure is estimated. Regarding the sensitising effects of the substance, exposure time should be reduced or other effective RMMs should be considered.

### PROC8a: Transfer of substance or preparation (charging/ discharging) from/ to vessels/ large containers at non-dedicated facilities

Elevated exposure is estimated. Regarding the sensitising effects of the substance, exposure time should be reduced or other effective RMMs should be considered.

#### PROC10: Roller application or brushing

Elevated exposure is estimated. Regarding the sensitising effects of the substance, exposure time should be reduced or other effective RMMs should be considered.

#### PROC13: Treatment of articles by dipping and pouring

Elevated exposure is estimated. Regarding the sensitising effects of the substance, exposure time should be reduced or other effective RMMs should be considered.

#### Conditions and measures related to personal protection, hygiene and health evaluation

For processes where the opportunity for exposure arises, the use of gloves and protective clothing is stipulated. Protective gloves complying with EN 374. Wear eye protection/ face protection. In short-term processes where contact to substance cannot be excluded (e.g. sampling operations), an air-fed mask or a combination of activated carbon filter and particular filter is required. Keep away from foodstuffs, drinks and tobacco. Wash hands before breaks and at end of work and use skin-protecting ointment. Keep working clothes separately. Take off all contaminated clothing immediately.

#### **PROC7: Industrial spraying**

Wear a one-way overall, gloves and a full-face respirator mask with external air supply.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name:

DD-Härter B05-901/10 for two component one coat paint, mixing rate 10:1 06.10.2023

PROC 15	ECETOC TRA	LEV: 90% efficiency	long term, inhalation	0,21 mg/m³	0,42
	Qualitative assessment		Workers (dermal)	*	

\*Due to the applied RMMs it is considered that the risks of dermal exposure are sufficiently controlled.

Based on the applied RMMs the risk towards humans and the environment is sufficiently controlled (RCR  $\leq$  1).

### 4. Guidance to Downstream User to evaluate whether he works inside the boundaries set by the Exposure Scenario

A downstream user may evaluate whether he operates within the conditions set in the exposure scenario by using the information provided in section 2. This evaluation may be based on an expert judgement or on the utilisation of risk assessment tools that are recommended by ECHA.
