Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name: DD-Härter B05-901/10 for two component  
one coat paint, mixing rate 10:1  
Date of printing: 07.11.2025

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

### 1.1 Product identifier

Product name: DD-Härter B05-901/10 for two component one coat paint,  
mixing rate 10:1  
Unique Formula Identifier (UFI-Code): KM30-E0T8-H00X-MGNM  
Product type: Curing agent

### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Field of application: metal industry  
Identified uses: Industrial applications, Professional applications, Used by spraying.

### 1.3 Details of the supplier of the safety data sheet:

Producer/Supplier: Bisdorf GmbH  
Industriestraße 49-51  
D-52224 Stolberg  
Telephone: +49 (0) 2402 / 71048  
Telefax: +49 (0) 2402 / 75465  
E-Mail address: [bisdorf-lacke@arcor.de](mailto:bisdorf-lacke@arcor.de)

### 1.4 Emergency telephone number

Emergency information: Information Center against Poisons  
University Bonn  
Telephone number: +49 (0)228 / 19240  
Date of issue: 07.11.2025  
Date of previous issue: 06.10.2023

## SECTION 2: Hazards identification

### 2.1 Classification of the substance or mixture

Product definition: Mixture  
Classification according to Regulation (EC) No. 1272/2008 [CLP]

#### Classification acc. to GHS

Section	Hazard class	Hazard class and category	Hazard statement
2.6	flammable liquid	Flam. Liq. 3	H226
3.1I	acute toxicity (inhal.)	Acute Tox. 4	H332
3.2	skin corrosion/irritation	Skin Irrit. 2	H315
3.4S	skin sensitisation	Skin Sens. 1	H317
3.8R	specific target organ toxicity - single exposure (respiratory tract irritation)	STOT SE 3	H335
3.8D	specific target organ toxicity - single exposure (narcotic effects, drowsiness)	STOT SE 3	H336

See Section 11 for more detailed information on health effects and symptoms.

# SAFETY DATA SHEET

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name: DD-Härter B05-901/10 for two component

## 2.2 Label elements

Hazard pictograms:

Signal word: Danger

Hazard statements:  
H226 - Flammable liquid and vapor.  
H315 - Causes skin irritation.  
H317 - May cause an allergic skin reaction.  
H332 - Harmful if inhaled.  
H335 - May cause respiratory irritation.  
H336 - May cause drowsiness or dizziness.  
EUH066 - Repeated exposure may cause skin dryness or cracking.  
EUH204 - Contains isocyanates. May produce an allergic reaction.

Precautionary statements:

Prevention:  
P210 - Keep away from heat/sparks/open flames/hot surfaces. - No smoking.  
P260 - Do not breathe dust/ fume/ gas/ mist/ vapors/ spray.  
P271 - Use only outdoors or in a well-ventilated area.  
P280 - Wear protective gloves/protective clothing/eye protection/face protection.  
Response:  
P301 + P310 - IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.  
P303 + P361 + P353 - IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.  
P304 + P340 - IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing  
P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
P314 - Get medical advice/attention if you feel unwell.  
P331 - Do NOT induce vomiting.  
Storage:  
P403 + P233 - Store in a well-ventilated place. Keep container tightly closed.  
P403 + P235 - Store in a well-ventilated place. Keep cool.  
P405 - Store locked up.  
Disposal:  
P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.

Supplemental label elements: Contains isocyanates. May produce an allergic reaction.

Indication at Labelling:

The pictogram GHS 02 (flame) can according GHS/CLP Art. 33 (3) substituted to label of ADR.

## 2.3 Other hazards

Endocrine disrupting properties (human health):

The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Endocrine disrupting properties (environment):

The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

# SAFETY DATA SHEET

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name: DD-Härter B05-901/10 for two component

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] No restriction regulation for the industrial and professional use of this product as the concentration is less than 0.1%.

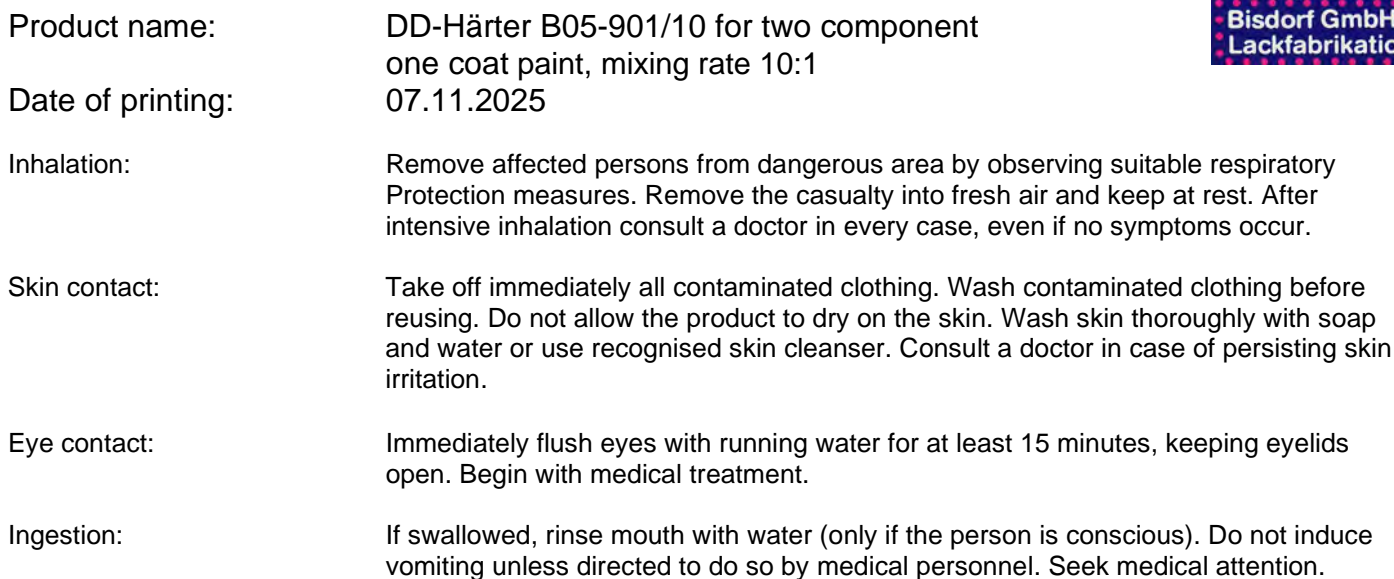

Occupational exposure limits, if available, are listed in Section 8.

## SECTION 4: First aid measures

### 4.1. Description of first aid measures

General information: In all cases of doubt, or when symptoms persist, seek medical attention. If unconscious, place in recovery position and get medical attention immediately. Never give anything by mouth to an unconscious person. In any case show the physician the Safety Data Sheet.

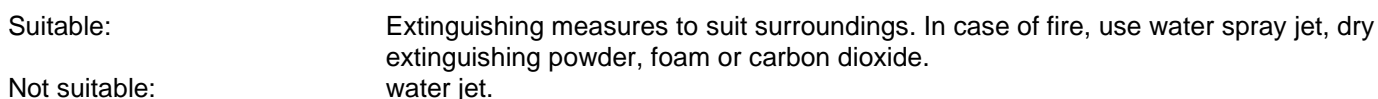

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

General information: When inhaled or swallowed depending on the time and amount, it can give rise to the following symptoms: headaches, giddiness, tiredness, nausea, vomiting, irregular heart beat, intoxication, unconsciousness, asphyxiation and fatality.

Notes to physician: Symptomatic treatment.

### 5.1 Extinguishing media

Hazardous combustion

Products: Fire will produce dense black smoke containing hazardous combustion products. In a fire, the following may be released: carbon dioxide, carbon monoxide, not combusted hydrocarbons.

Special protective equipment for fire-fighters: During fire-fighting wear self-contained breathing apparatus and protective clothing.

Additional information: The product is flammable. Use water spray to keep fire-exposed containers cool. Use extinguishing media suitable for surrounding materials. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

# SAFETY DATA SHEET

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name: DD-Härter B05-901/10 for two component  
one coat paint, mixing rate 10:1  
Date of printing: 07.11.2025

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

General information: To avoid fire, eliminate ignition sources. Provide adequate ventilation. Use personal protective equipment. Avoid contact with eyes, skin and clothing. Avoid breathing vapours, spray or mists.

### 6.2 Environmental precautions

General information: Do not discharge into the drains / surface waters / groundwater. Prevent spread over a wide area e.g. by containment or oil barriers.

### 6.3 Methods and material for containment and cleaning up

General information: Absorb with liquid-binding material (sand, diatomite, universal binders etc.) or use a spill kit. Containers in which spilt substance has been collected must be adequately labelled. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

### 6.4 Reference to other sections

General information: See Section 1 for emergency contact information.  
See Section 8 for information on appropriate personal protective equipment.  
See Section 13 for additional waste treatment information.

## SECTION 7: Handling and storage

### 7.1 Precautions for safe handling

Protective measures: Keep away from sources of ignition - No smoking. Vapours may form explosive mixtures with air.  
Take precautionary measures against electrostatic discharges. Provide good ventilation of working area. The working procedure should be planned as far as allowed by state-of-the-art technology so as to avoid release of hazardous substances or prevent skin contact. The level of risk involved in product handling must be reduced to a minimum by means of protective and preventive measures.

### 7.2 Conditions for safe storage, including any incompatibilities

General information: Store in a dry, cool and well-ventilated area. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. Store in accordance with local regulations.

German storage class: 10 - Combustible liquids neither in Storage Class 3

### 7.3 Specific end use(s)

See separate Product Data Sheet for recommendations or industrial sector specific solutions.

## 8.2 Exposure controls / personal protection

### Engineering measures

Refer to protective measures listed in sections 7.

### Personal protective equipment:

#### Respiratory protection

Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If working areas have insufficient ventilation: When the product is applied by means that will not generate an aerosol such as, brush or roller wear half or totally covering mask equipped with gas filter of type A, when grinding use particle filter of type P. Be sure to use an approved/certified respirator or equivalent.

#### Hand protection

If there is a potential for product skin contact, use of gloves tested to e.g. EN 374 will provide sufficient protection. Protective gloves should in any case be tested for workplace-specific suitability (e.g. mechanical resistance, product compatibility, antistatic properties). Comply with instructions and information provided by the glove manufacturer concerning use, care and replacement of the gloves. Replace protective gloves immediately upon damage or at the first signs of wear. As far as possible, plan work procedures so that wearing gloves will not be necessary.

	Long term exposure	Short term exposure
Recommended gloves should be made of	Viton®	Nitril.
Material thickness	>0,7 mm	>0,4 mm
Permeation time	>480 min	>480 min

#### Eye protection

Safety goggles with lateral shielding (DIN EN 166)

#### Body protection

Usual working clothes for the chemical industry, suitable for the job.

### Environmental exposure controls:

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## SECTION 9: Physical and chemical properties

### 9.1 Information on basic physical and chemical properties

#### Appearance

Physical state: Fluid                      Colour: Colorless

Odor: Characteristic

Odor threshold: Not relevant for the hazard classification of the product.

#### Security-relevant basic data

Parameter	
pH-value	Not applicable.
Melting point/Melting range	-76 °C
Boiling point/Boiling range	124 - 128 °C
Flash point	~25 °C (IP 170 (ABEL))
Flammability (solid / gas)	Not applicable.
Ignition temperature	~420 ° C (lowest value of the individual components)
Decomposition temperature	Not determined.
Auto-ignition temperature	The product is not self-igniting.
Explosive properties	Product is not explosive. However, formation of explosive air/steam mixtures as possible.
Explosion limits Lower Upper Oxidizing properties	1,2 %(Vol) 7,5 %(Vol) Not determined
Vapour pressure	13 hPa (20 °C)
Density	~1,03 g/cm <sup>3</sup> (20 °C)
Vapor density	Not determined
Evaporation rate	No data available.
Solubility in Miscibility with water	Organic solvents (see point 3) Reacts with water! (immiscible at 15 °C)
Partition coefficient: (n-octanol/water)	Testing not relevant or not possible due to nature of the product.
Viscosity (expiry time after DIN 53211) Dynamic: Kinematic:	~10 s DIN 4mm (20°C)
Solvent separation test	< 3% (20°C)

### 9.2. Other information

No additional information.

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

General information: No specific test data related to reactivity available for this product or its ingredients.

### 10.2 Chemical stability

General information: The product is stable.

### 10.3 Possibility of hazardous reactions

General information: Rubber and other synthetic material can be affected.

### 10.4 Conditions to avoid

General information: The product is flammable. Keep away from excessive heat, sparks or open fire.

### 10.5 Incompatible materials

General information: oxidising agents, acids

### 10.6 Hazardous decomposition products

General information: Thermal disintegration depends to a great extent on the external conditions. A complex mixture of solids, liquids and gases forms in the air, including among other substances carbon dioxide, carbon monoxide and other organic compounds, when this material is burnt or is thermally or oxidatively degraded.

Date of printing: 07.11.2025

## Information on the likely routes of exposure

Routes of entry anticipated: Oral, Dermal, Inhalation.

## Potential chronic health effects

Inhaling of solvent components above the MWC-value can lead to health damage, e.g. irritation of the mucous membrane and respiratory organs, as well as damage to the liver, kidneys and the central nerve system. Indications for this are: headache, dizziness, fatigue, amyosthenia, drowsiness, in serious cases: unconsciousness. Solvents may cause some of the aforementioned effects through skin resorption. Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in non-allergic contact dermatitis and/or absorption through skin. Splashing may cause eye irritation and reversible damage.

## 11.2 Endocrine disrupting properties

See Section 2 for details.

## 11.3 Other hazards

The product is flammable. Keep away from excessive heat, sparks or open fire. In use, may form flammable/explosive vapour/air mixture. Electrostatic charges may be generated during pumping, release of which may cause a fire.

## 12.6 Endocrine disrupting properties

See Section 2 for details.

## 12.7 Other adverse effects

No known significant effects or critical hazards.

## SECTION 13: Disposal considerations

### 13.1 Waste treatment methods

The generation of waste should be avoided or minimised wherever possible. Residues of the product is listed as hazardous waste. Dispose of according to all state and local applicable regulations. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Spillage, remains, discarded clothes and similar should be discarded in a fireproof container.

European waste catalogue no. (EWC) is given below.

European waste catalogue (EWC): 08 01 11\*

### Packaging

The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

## SECTION 14: Transport information

Transport may take place according to national regulation or ADR for transport by road, RID for transport by train, IMDG for transport by sea, IATA for transport by air.

## 14.6 Special precautions for user

Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

## 14.7 Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code

Not applicable.

## SECTION 15: Regulatory information

### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

#### EU Regulation

Regulation (EG) Nr. 1907/2006 (REACH)

Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), with supplements.

Regulation (EG) Nr. 1272/2008 (CLP)

Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labeling and packaging of substances and mixtures (CLP), with supplements.

EU Regulation (EC) No. 1907/2006 (REACH)

Annex XIV - List of substances subject to authorisation

Substances of very high concern

Substances mentioned on the so-called "candidate list of substances of very high concern (SVHC) for authorisation" published by the ECHA are not intentionally added to this product. Therefore it is not expected, that these substances are present in amounts of  $\geq 0,1\%$  in this product.

#### National legislation (Germany)

**Water hazard class:** WGK 2 (Assessment by list): hazardous for water.

**VOC:** 480 g/l DIN ISO 11890 (Council Directive 1999/13/EC).

**Information about limitation of use:** Employment restrictions concerning young persons must be observed.

### 15.2 Chemical Safety Assessment

This product contains substances for which Chemical Safety Assessments are still required.

## Notice to reader

The information contained in this safety data sheet is based on the present state of knowledge and EU and national legislation. It provides guidance on health, safety and environmental aspects for handling the product in a safe way and should not be construed as any guarantee of the technical performance or suitability for particular applications. It is always the duty of the user/employer to ascertain that the work is planned and carried out in accordance with the national regulations.

## Annex: Exposure scenario 1

### SECTION 1: Title section

**Short title of the exposure scenario** Formulation & (re)packing of substances and mixtures (Industrial)

**Sector of Use** SU3 Industrial uses: Uses of substances as such or in preparations at industrial sites

#### Process category

PROC1 Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions.

PROC2 Chemical production or refinery in closed continuous process with occasional controlled exposure or processes with equivalent containment conditions

PROC3 Manufacture or formulation in the chemical industry in closed batch processes with occasional controlled exposure or processes with equivalent containment condition

PROC4 Chemical production where opportunity for exposure arises

PROC5 Mixing or blending in batch processes

PROC8a Transfer of substance or mixture (charging and discharging) at non-dedicated facilities

PROC8b Transfer of substance or mixture (charging and discharging) at dedicated facilities

PROC9 Transfer of substance or mixture into small containers (dedicated filling line, including weighing)

PROC14 Tableting, compression, extrusion, pelletisation, granulation

PROC15 Use as laboratory reagent

**Environmental release category** ERC2 Formulation into mixture

#### Description of the activities / processes covered in the Exposure Scenario

Formulation, packing and re-packing of the substance and its mixtures in batch or continuous operations, including storage, materials transfers, mixing, tableting, compression, pelletisation, extrusion, large and small scale packing, sampling, maintenance and associated laboratory activities.

### SECTION 2: Conditions of use affecting exposure

The usual precautionary measures should be adhered to in handling the chemicals.

**Duration and frequency** 8hrs (full working shift).

#### Worker

Frequency of use:

5 workdays/week.

#### Physical parameters

##### Physical state

Fluid

Vapour pressure: 0.5-10 kPa (20 °C)

**Concentration of the substance in the mixture** Covers use of substance / product up to 100%

#### Used amount per time or activity

Regional use tonnage (tonnes/year): 15000, SU3

Annual site tonnage (tonnes/year): 3750, SU3

Maximum daily site tonnage (kg/day): 12500, SU3

#### Other operational conditions

Emission days / year: 300

Assumes use at not more than 20°C above ambient temperature (unless stated differently).

Assumes a good basic standard of occupational hygiene is implemented.

#### Other operational conditions affecting environmental exposure

Local freshwater dilution factor: 10

Local marine water dilution factor: 100

Release fraction to air from process (initial release prior to RMM) / wide dispersive use (regional only): 1 %.

Release fraction to wastewater from process (initial release prior to RMM) / wide dispersive use: 0.2 %.

Release fraction to soil from process (initial release prior to RMM) / wide dispersive use (regional only): 0.01 %.

## **Other operational conditions affecting worker exposure**

*Clean working place and equipment every day. Avoid splashing. Remove spilled product immediately.*

*Keep container tightly closed in a cool place.*

*Avoid contact with the skin and eyes.*

## **Other operational conditions affecting consumer exposure during the use of the product**

*Not applicable.*

**Risk management measures** *Ensure that personal protective measures are used at all activities.*

## **Worker protection**

**Storage (PROC1 / PROC2):**

*Store substance within a closed system.*

**General exposures / Use (closed systems) PROC1 / PROC2 / PROC3:**

**Laboratory activities (PROC15):**

*No other specific measures identified.*

**Batch processes at elevated temperatures. Operation is carried out at elevated temperature (> 20°C above ambient temperature) PROC3:**

*Store / Handle product in closed systems.*

*Provide extract ventilation to points where emissions (can) occur.*

**Preparation of material for application. Use in contained batch (PROC3):**

**General exposures / Use (open systems) PROC4:**

*Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour).*

**Process sampling (PROC3):**

*Provide a good standard of general ventilation.*

*Avoid carrying out activities involving exposure for more than 1 hour(s).*

**Mixing operations (open systems) PROC5:**

**Material transfers Drum/Batch transfer (Non-dedicated facility) PROC8a:**

**Material transfers Drum/batch transfers (Non-dedicated facility) PROC8b:**

**Material transfers Drum/batch transfers (dedicated facility) PROC8b:**

**Filling of drums and small containers (PROC 9):**

**Production or preparation of articles by tableting, compression, extrusion or pelletisation (PROC14):**

*Provide a good standard of general or controlled ventilation (10 to 15 air changes per hour).*

**Bulk transfers (closed systems) PROC8b:**

*Ensure that material transfer is avoided or provide extract ventilation. Use local exhaust at places where emission can occur.*

**Equipment cleaning and maintenance (PROC 8a, 8b):**

*Drain or remove substance from equipment prior to break-in or maintenance.*

*Retain drain downs in sealed storage pending disposal or for subsequent recycle.*

## **Organisational protective measures**

*Ensure good ventilation. This can be achieved by using a local exhaust or general exhaust system. If these measures are insufficient to keep the solvent vapour concentration below the workplace limit, wear an adequate respiratory protective device.*

*The employer must ensure that the necessary personal protective devices are available and applied accordingly to the instructions.*

## **Technical protective measures**

*Provide explosion-proof electrical equipment.*

*Ensure that suitable extractors are available on processing machines*

## **Personal protective measures**

*Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.*

*Do not inhale gases / fumes / aerosols.*

*Safety glasses*

**Measures for consumer protection** *Not relevant for this Exposure Scenario.*

## **Environmental protection measures**

### **Air**

*Treatment of air emissions is not required for the purposes of REACH compliance but may be needed to comply with other environmental legislation.*

*Treat air emission to provide a typical removal efficiency of (%): 0*

## Annex: Exposure scenario 3

### SECTION 1: Title section

**Short title of the exposure scenario** *Uses in Coatings - Professional*

#### **Sector of Use**

SU22 Professional uses: Public domain (administration, education, entertainment, services, craftsmen)

#### **Process category**

PROC1 Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions.

PROC2 Chemical production or refinery in closed continuous process with occasional controlled exposure or processes with equivalent containment conditions

PROC3 Manufacture or formulation in the chemical industry in closed batch processes with occasional controlled exposure or processes with equivalent containment condition

PROC4 Chemical production where opportunity for exposure arises

PROC5 Mixing or blending in batch processes

PROC8a Transfer of substance or mixture (charging and discharging) at non-dedicated facilities

PROC8b Transfer of substance or mixture (charging and discharging) at dedicated facilities

PROC10 Roller application or brushing

PROC11 Non industrial spraying

PROC13 Treatment of articles by dipping and pouring

PROC15 Use as laboratory reagent

PROC19 Manual activities involving hand contact

#### **Environmental release category**

ERC8a Widespread use of non-reactive processing aid (no inclusion into or onto article, indoor)

ERC8d Widespread use of non-reactive processing aid (no inclusion into or onto article, outdoor)

#### **Description of the activities / processes covered in the Exposure Scenario**

Covers the use in coatings (paints, inks, adhesives, etc) including exposures during use (including materials receipt, storage, preparation and transfer from bulk and semi-bulk, application by spray, roller, spreader, dip, flow, fluidised bed on production lines and film formation) and equipment cleaning, maintenance and associated laboratory activities.

### SECTION 2: Conditions of use affecting exposure

The usual precautionary measures should be adhered to in handling the chemicals.

**Duration and frequency** 8hrs (full working shift).

#### **Worker**

Frequency of use:

5 workdays/week.

#### **Physical parameters**

##### **Physical state**

Fluid

Vapour pressure: 0.5-10 kPa (20 °C)

##### **Concentration of the substance in the mixture**

Covers use of substance / product up to 100% (unless stated otherwise).

##### **Used amount per time or activity**

Regional use tonnage (tonnes/year): 5000, SU22

Annual site tonnage (tonnes/year): 10, SU22

Maximum daily site tonnage (kg/day): 27.4, SU22

##### **Other operational conditions**

Continuous release.

Emissiondays /year: 365

Assumes use at not more than 20°C above ambient temperature (unless stated differently).

Assumes a good basic standard of occupational hygiene is implemented.

##### **Other operational conditions affecting environmental exposure**

Local freshwater dilution factor: 10

Local marine water dilution factor: 100

# Annex to the extended Safety Data Sheet (eSDS)

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name: DD-Härter B05-901/10 for two component  
one coat paint, mixing rate 10:1  
Date of printing: 07.11.2025

Release fraction to air from process (initial release prior to RMM) / wide dispersive use (regional only): 98 %.

Release fraction to wastewater from process (initial release prior to RMM) / wide dispersive use: 1 %.

Release fraction to soil from process (initial release prior to RMM) / wide dispersive use (regional only): 1 %.

## **Other operational conditions affecting worker exposure**

Clean working place and equipment every day. Avoid splashing. Remove spilled product immediately.

Keep container tightly closed in a cool place.

Avoid contact with the skin and eyes.

## **Other operational conditions affecting consumer exposure during the use of the product**

Not applicable.

## **Risk management measures**

Ensure that personal protective measures are used at all activities.

Other skin protection measures such as impervious suits and face shields may be required during high dispersion activities which are likely to lead to substantial aerosol release, e.g. spraying.

## **Worker protection**

Storage (PROC1 / PROC2):

Store substance within a closed system.

General exposures / Use (closed systems) PROC1 / PROC2 / PROC3:

Filling / preparation of equipment from drums or containers (Use in closed systems) PROC2:

Ensure material transfers are under containment or extract ventilation.

Preparation of material for application. Use in contained batch (PROC3):

Provide a good standard of general or controlled ventilation (5 to 15 air changes per hour).

Use drum pumps or carefully pour from container.

Film formation - air drying Indoor (PROC4):

Provide a good standard of general ventilation.

Provide extract ventilation to points where emissions (can) occur.

Avoid manual contact with wet work pieces.

Film formation - air drying Outdoors (PROC 4):

Ensure operation is undertaken outdoors. Avoid manual contact with wet work pieces. Clear spills immediately.

Avoid carrying out activities involving exposure for more than 1 hour(s).

Preparation of material for application Indoor PROC 5:

Provide a good standard of general ventilation (10 to 15 air changes per hour).

Controlled ventilation means air is supplied or removed by a powered fan.

Avoid carrying out activities involving exposure for more than 1 hour(s).

Preparation of material for application Outdoor (PROC 5):

Ensure operation is undertaken outdoors.

Avoid carrying out activities involving exposure for more than 1 hour(s).

Material transfers Drum/Batch transfer (Non-dedicated facility) PROC8a:

Material transfers Drum/batch transfers (Non-dedicated facility) PROC8b:

Material transfers Drum/batch transfers (dedicated facility) PROC8b:

Transfer via enclosed lines.

Clear transfer lines prior to de-coupling.

Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour).

Equipment cleaning and maintenance (Non-dedicated facility) PROC 8a:

Drain down system prior to equipment break-in or maintenance.

Avoid carrying out activities involving exposure for more than 4 hour(s).

Provide a good standard of general or controlled ventilation (10 to 15 air changes per hour).

Roller, spreader, flow application Indoor (PROC 10):

Provide a good standard of general or controlled ventilation (10 to 15 air changes per hour).

Wear a respirator conforming to EN140 with Type A filter or better.

Roller, spreader, flow application Outdoor (PROC 10):

Dipping, immersion and pouring Outdoor (PROC 13):

Ensure Operation is undertaken outdoors. Wear a respirator conforming to EN140 with Type A filter or better. Automate activity where possible.

## *Spraying Manual (PROC 11):*

*Carry out in a vented booth or extracted enclosure.*

## *Spraying (PROC 11, außen):*

*Ensure operation is undertaken outdoors.*

*Avoid carrying out activities involving exposure for more than 4 hour(s).*

*Wear a respirator conforming to EN140 with Type A filter or better.*

## *Dipping, immersion and pouring Indoor (PROC 13):*

*Use local exhaust at places where emission can occur.*

*Avoid carrying out activities involving exposure for more than 4 hour(s).*

## *Laboratory activities (PROC15):*

*Handle substance within a predominantly closed system provided with extract ventilation.*

*Hand application - fingerpaints, pastels, adhesives PROC19 Indoor:*

*Provide a good standard of general or controlled ventilation (10 to 15 air changes per hour).*

*Limit the substance content in the product to 5%.*

*Hand application - fingerpaints, pastels, adhesives PROC19 Outdoor:*

*Ensure operation is undertaken outdoors.*

*Limit the substance content in the product to 5%.*

*Avoid carrying out activities involving exposure for more than 4 hour(s).*

## **Organisational protective measures**

*Ensure good ventilation. This can be achieved by using a local exhaust or general exhaust system. If these measures are insufficient to keep the solvent vapour concentration below the workplace limit, wear an adequate respiratory protective device.*

*The employer must ensure that the necessary personal protective devices are available and applied accordingly to the instructions.*

## **Technical protective measures**

*Provide explosion-proof electrical equipment.*

*Ensure that suitable extractors are available on processing machines*

## **Personal protective measures**

*Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.*

*Do not inhale gases / fumes / aerosols.*

*Safety glasses*

**Measures for consumer protection** Not relevant for this Exposure Scenario.

## **Environmental protection measures**

### **Air**

*Treatment of air emissions is not required for the purposes of REACH compliance but may be needed to comply with other environmental legislation.*

*Treat air emission to provide a typical removal efficiency of (%): 0*

### **Water**

*Sludge treatment: Incineration or in a landfill*

*Prevent discharge of undissolved substance to or recover from onsite wastewater.*

*Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs (%): 93.6*

*Maximum allowable site tonnage (MSafe) based on release following total wastewater treatment removal (kg/day): 4600*

*Assumed domestic sewage treatment plant flow (m3/d): 2000*

**Soil** Use bunds or dykes around storage facilities to prevent soil and water pollution in the event of a spill.

## **Disposal measures**

*External treatment and disposal of waste should comply with applicable local and/or national regulations.*

*External recovery and recycling of waste should comply with applicable local and/or national regulations.*

**Waste type** Partially emptied and uncleaned packaging

**Notes** Disposal must be made according to official regulations.

## SECTION 4: Guidance for downstream users

The exposure estimation was carried out in accordance with ECETOC TRA.

Version 3. <http://www.ecetoc.org/tra>

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/ Operational Conditions outlined in Section 2 are implemented. Where other Risk Management Measures/ Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

## Annex: Exposure scenario 3

### SECTION 1: Title section

**Short title of the exposure scenario** Uses in Coatings - Professional

#### Sector of Use

SU22 Professional uses: Public domain (administration, education, entertainment, services, craftsmen)

#### Process category

PROC1 Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions.

PROC2 Chemical production or refinery in closed continuous process with occasional controlled exposure or processes with equivalent containment conditions

PROC3 Manufacture or formulation in the chemical industry in closed batch processes with occasional controlled exposure or processes with equivalent containment condition

PROC4 Chemical production where opportunity for exposure arises

PROC5 Mixing or blending in batch processes

PROC8a Transfer of substance or mixture (charging and discharging) at non-dedicated facilities

PROC8b Transfer of substance or mixture (charging and discharging) at dedicated facilities

PROC10 Roller application or brushing

PROC11 Non industrial spraying

PROC13 Treatment of articles by dipping and pouring

PROC15 Use as laboratory reagent

PROC19 Manual activities involving hand contact

#### Environmental release category

ERC8a Widespread use of non-reactive processing aid (no inclusion into or onto article, indoor)

ERC8d Widespread use of non-reactive processing aid (no inclusion into or onto article, outdoor)

#### Description of the activities / processes covered in the Exposure Scenario

Covers the use in coatings (paints, inks, adhesives, etc) including exposures during use (including materials receipt, storage, preparation and transfer from bulk and semi-bulk, application by spray, roller, spreader, dip, flow, fluidised bed on production lines and film formation) and equipment cleaning, maintenance and associated laboratory activities.

### SECTION 2: Conditions of use affecting exposure

The usual precautionary measures should be adhered to in handling the chemicals.

**Duration and frequency** 8hrs (full working shift).

#### Worker

Frequency of use:

5 workdays/week.

**Environment** The product may not be released into the environment without control.

#### Physical parameters

##### Physical state

Fluid

Vapour pressure: 11.6 hPa (20 °C)

**Concentration of the substance in the mixture** Covers use of substance / product up to 100%

**Used amount per time or activity** Annual site tonnage (tons per year): 2000

#### Other operational conditions

Emission days / year: 225

Assumes a good basic standard of occupational hygiene is implemented.

Assumes use at ambient temperature (unless stated differently).

#### Other operational conditions affecting environmental exposure

Local freshwater dilution factor: 10

Local marine water dilution factor: 100

Flow rate of receiving surface water: 18000 m<sup>3</sup>/day.

Release fraction to air from process (initial release prior to RMM) / wide dispersive use (regional only): 99 %.

# Annex to the extended Safety Data Sheet (eSDS)

*Release fraction to wastewater from process (initial release prior to RMM) / wide dispersive use: 1 %.*  
*Release fraction to soil from process (initial release prior to RMM) / wide dispersive use (regional only): 0 %.*

## **Other operational conditions affecting worker exposure**

*Clean working place and equipment every day. Avoid splashing. Remove spilled product immediately.*  
*Keep container tightly closed in a cool place.*  
*Avoid contact with the skin and eyes.*

## **Other operational conditions affecting consumer exposure during the use of the product**

*Not applicable.*

## **Risk management measures**

*Ensure that personal protective measures are used at all activities.*  
*Wear suitable gloves tested to EN374 during the activities where excessive skin contact is possible.*  
*Eye Protection – suitable eye protection should be worn when handling product if there is a risk of splashing.*

## **Worker protection**

*General exposures / Use (closed systems) PROC1 / PROC2 / PROC3:*

*General exposures / Use (open systems) PROC4:*

*Mixing operations (open systems) PROC5:*

*Laboratory activities (PROC15):*

*No other specific measures identified.*

*Material transfers Drum/Batch transfer (Non-dedicated facility) PROC8a:*

*Limit the substance content in the product to 25%.*

*Use local exhaust at places where emission can occur.*

*Material transfers Drum/batch transfers (Non-dedicated facility) PROC8b:*

*Material transfers Drum/batch transfers (dedicated facility) PROC8b:*

*Transfer via enclosed lines.*

*Clear transfer lines prior to de-coupling.*

*Apply by Rolling or Brushing (PROC10):*

*Treatment by dipping and pouring (PROC13):*

*Provide a good standard of general or controlled ventilation (10 to 15 air changes per hour).*

*Spraying (PROC 11):*

*Daily cleaning of equipment and work area. It must be ensured that the work is carried out outside the breathing zone of the worker (head-product distance greater than 1m). Regular inspection and maintenance of equipment and machinery.*

*Carry out in a vented booth or extracted enclosure.*

*Manual Spraying Indoor (PROC11) bis 45%:*

*Limit the substance content in the product to 45%.*

*It must be ensured that manual activity is minimized. Avoid frequent and direct contact with the substance.*

*Checks to verify the correct application of risk minimization measures and Compliance with the conditions of use are established. Daily cleaning of equipment and work area. Regular inspection and maintenance of equipment and machinery. Avoid splashes. Make sure doors and windows are open (general ventilation).*

*Use of a local source exhaust with adequate effectiveness.*

*Or:*

*Wearing a half mask with filter type P2L or better.*

*Hand application - fingerpaints, pastels, adhesives. PROC19:*

*Use local exhaust at places where emission can occur.*

*Avoid carrying out activities involving exposure for more than 4 hour(s).*

*Or: Provide a good standard of controlled ventilation (10 to 15 air changes per hour).*

*Avoid carrying out activities involving exposure for more than 1 hour(s).*

## **Organisational protective measures**

*Ensure good ventilation. This can be achieved by using a local exhaust or general exhaust system. If these measures are insufficient to keep the solvent vapour concentration below the workplace limit, wear an adequate respiratory protective device.*

*The employer must ensure that the necessary personal protective devices are available and applied accordingly to the instructions.*

*Provide explosion-proof electrical equipment.*

*Ensure that suitable extractors are available on processing machines*

## Personal protective measures

*Detailed measures on hand protection according to Safety Data Sheet, section 8.*

*Do not inhale gases / fumes / aerosols.*

**Measures for consumer protection** *Not relevant for this Exposure Scenario.*

## Environmental protection measures

### Air

*Treatment of air emissions is not required for the purposes of REACH compliance but may be needed to comply with other environmental legislation.*

### Water

*Size of sewage treatment plant (m<sup>3</sup>/d): 2000*

*Maximum allowable site tonnage (MSafe) based on release following total wastewater treatment removal (kg/day): 1934.6*

*Prevent discharge of undissolved substance to or recover from onsite wastewater.*

**Soil** *No special measures required.*

## Disposal measures

*Must not be disposed of with household waste. Do not allow to reach sewage system.*

*Disposal must be made according to official regulations.*

## Environment factors not influenced by risk management

Remarks : None identified for this scenario.

## Other given operational conditions affecting environmental exposure

Number of emission days per year : < 300  
Emission or Release Factor: Air : 0  
Emission or Release Factor: Water : 0  
Emission or Release Factor: Soil : 0

## Technical conditions and measures / Organizational measures

### Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil

Air : All waste gases from processes are transferred to a combustion unit or to an activated carbon filter.  
Water : No waste water occurs.  
Soil : Sealing of all relevant soil surfaces in the facility is required.

### Organizational measures to prevent/limit release from the site

Remarks : Procedural and/or control technologies are used to minimise emissions and the resulting exposure during cleaning and maintenance procedures.

## Conditions and measures related to external treatment of waste for disposal

Waste treatment : Organic solvent used for cleaning procedures is disposed off via a hazardous waste combustion unit. The waste from processes is disposed by incineration in a waste combustor. During waste treatment, exposure of the environment is not expected.

## 2.2 Contributing scenario controlling worker exposure for:

PROC1, PROC2, PROC3, PROC4, PROC5, PROC7, PROC8a, PROC8b, PROC9, PROC10, PROC13, PROC14, PROC15

### Product characteristics

## Technical conditions and measures

Use with local exhaust ventilation. Minimal efficiency extract ventilation: 90% In long-term processes where contact to substance cannot be excluded (e.g. filling and mixing operations), containment (e.g. housing) is recommended.

### PROC7: Industrial spraying

Local exhaust ventilation (about 0.3 m/s) has to be used from top to down and overspray has to be collected in a filter.

## Organisational measures to prevent /limit releases, dispersion and exposure

Procedural and/or control technologies are used to minimise emissions and the resulting exposure during cleaning and maintenance procedures. Persons who suffer from skin complaints or other hypersensitivity reactions of skin should not work with the product. Control staff entry to work area. Ensure all equipment is well maintained. Regular cleaning of equipment, work area and clothing.

### PROC5: Mixing or blending in batch processes for formulation of preparations and articles (multistage and/or significant contact)

Elevated exposure is estimated. Regarding the sensitising effects of the substance, exposure time should be reduced or other effective RMMs should be considered.

### PROC8a: Transfer of substance or preparation (charging/ discharging) from/ to vessels/ large containers at non-dedicated facilities

Elevated exposure is estimated. Regarding the sensitising effects of the substance, exposure time should be reduced or other effective RMMs should be considered.

### PROC10: Roller application or brushing

Elevated exposure is estimated. Regarding the sensitising effects of the substance, exposure time should be reduced or other effective RMMs should be considered.

### PROC13: Treatment of articles by dipping and pouring

Elevated exposure is estimated. Regarding the sensitising effects of the substance, exposure time should be reduced or other effective RMMs should be considered.

## Conditions and measures related to personal protection, hygiene and health evaluation

For processes where the opportunity for exposure arises, the use of gloves and protective clothing is stipulated. Protective gloves complying with EN 374. Wear eye protection/ face protection. In short-term processes where contact to substance cannot be excluded (e.g. sampling operations), an air-fed mask or a combination of activated carbon filter and particular filter is required. Keep away from foodstuffs, drinks and tobacco. Wash hands before breaks and at end of work and use skin-protecting ointment. Keep working clothes separately. Take off all contaminated clothing immediately.

### PROC7: Industrial spraying

Wear a one-way overall, gloves and a full-face respirator mask with external air supply.

### Other operational conditions affecting workers exposure

Outdoor / Indoor : Indoor use

# Annex to the extended Safety Data Sheet (eSDS)

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II

Product name: DD-Härter B05-901/10 for two component  
one coat paint, mixing rate 10:1

Date of printing: 07.11.2025

## Technical conditions and measures

Use with local exhaust ventilation. Minimal efficiency extract ventilation: 90% In long-term processes where contact to substance cannot be excluded (e.g. filling and mixing operations), containment (e.g. housing) is recommended.

### PROC11: Non industrial spraying

Local exhaust ventilation (about 0.3 m/s) has to be used from top to down and overspray has to be collected in a filter.

## Organisational measures to prevent /limit releases, dispersion and exposure

Procedural and/or control technologies are used to minimise emissions and the resulting exposure during cleaning and maintenance procedures. Persons who suffer from skin complaints or other hypersensitivity reactions of skin should not work with the product. Control staff entry to work area. Ensure all equipment is well maintained. Regular cleaning of equipment, work area and clothing.

### PROC5: Mixing or blending in batch processes for formulation of preparations and articles (multistage and/or significant contact)

Elevated exposure is estimated. Regarding the sensitising effects of the substance, exposure time should be reduced or other effective RMMs should be considered.

### PROC8a: Transfer of substance or preparation (charging/ discharging) from/ to vessels/ large containers at non-dedicated facilities

Elevated exposure is estimated. Regarding the sensitising effects of the substance, exposure time should be reduced or other effective RMMs should be considered.

### PROC10: Roller application or brushing

Elevated exposure is estimated. Regarding the sensitising effects of the substance, exposure time should be reduced or other effective RMMs should be considered.

### PROC13: Treatment of articles by dipping and pouring

Elevated exposure is estimated. Regarding the sensitising effects of the substance, exposure time should be reduced or other effective RMMs should be considered.

## Conditions and measures related to personal protection, hygiene and health evaluation

For processes where the opportunity for exposure arises, the use of gloves and protective clothing is stipulated. Protective gloves complying with EN 374. Wear eye protection/ face protection. In short-term processes where contact to substance cannot be excluded (e.g. sampling operations), an air-fed mask or a combination of activated carbon filter and particular filter is required. Keep away from foodstuffs, drinks and tobacco. Wash hands before breaks and at end of work and use skin-protecting ointment. Keep working clothes separately. Take off all contaminated clothing immediately.

### PROC11: Non industrial spraying

Wear a one-way overall, gloves and a full-face respirator mask with external air supply.

\*Due to the applied RMMs it is considered that the risks of dermal exposure are sufficiently controlled.

Based on the applied RMMs the risk towards humans and the environment is sufficiently controlled (RCR ≤ 1).

## 4. Guidance to Downstream User to evaluate whether he works inside the boundaries set by the Exposure Scenario

A downstream user may evaluate whether he operates within the conditions set in the exposure scenario by using the information provided in section 2. This evaluation may be based on an expert judgement or on the utilisation of risk assessment tools that are recommended by ECHA.
